

A New Housing Project is Born in Ciudad Mayakoba

OHL Desarrollos and VINTE form a strategic alliance to develop 3,600 homes as part of a new urban development project for the city

OHL Desarrollos in partnership with VINTE will build 3,600 brand new dwellings within the development of Ciudad Mayakoba over a period of six years. The architectural design is based on community integration where residents can enjoy green areas, roads, educational, commercial and recreational facilities built in harmony with the natural environment.

Great importance has been given to this housing project, whose aim is to provide the personnel working in Mayakoba Riviera Maya hotels with the opportunity to access affordable, decent housing in a planned town. Additionally, due to proximity of the housing development to their workplace, workers will benefit from the substantial improvement in their quality of life.

On June 6, 2014, OHL Desarrollos Mexico signed the "Agreement of Collaboration" with Sedatu as witness of honor and the National Housing Organizations, CONAVI, INFONAVIT, FOVISSSTE and SHF. This agreement will ensure that all economic support offered by the federal government, in terms of grants from accredited Institutes of Housing to help with purchase of their homes, would be provided.

This housing project will bring about the alliance of two leaders, OHL Desarrollos, renowned for their quality and commitment to sustainable development and VINTE, an award winning homebuilder. Their unique skills will be brought together in this unique housing project for workers set in an exceptional location.

The first houses will go on sale during the third quarter of 2015.

ABOUT VINTE, Comprehensive Housing

VINTE is a housing developer focused on social, working-class and a middle-class market economies in Mexico.

Since its inception in 2001, VINTE has developed more than 20 thousand homes in four states of Mexico, and has received several awards, including seven national awards for housing; one of which is the Real Ibiza development located in Playa del Carmen.

ABOUT CIUDAD MAYAKOBA

Ciudad Mayakoba is a new integral concept located in the Riviera Maya, designed to become the first planned community of residential and business complexes in Playa del Carmen, Mexico. It is being built to respond to the area's rapid growth and demand in the housing market over the last decade. Over an area of 409 hectares, Ciudad Mayakoba is a resort where housing, residential lots with golf courses, shopping areas, mixed-use buildings, educational, sports and cultural facilities will be offered in addition to the development of biological corridors and conservation areas.
